General Dive Information	
Best time to travel: + Weather Informations (Temperature, visibility, wind etc...)	The best time to travel is from October to december with an outside temperature between 23 - 26 degrees. Best time to dive is in may - june (visibilities up to 25 m and a water temperature between 28 and 32 degrees) but on the surface you have an outside temperature up to 50 degrees and up to 90 % of humidity.
Kind of dives: Shore- boat dives, max. depth, current, Reef (sand, plateaus, reef), distance	The dives are from the boat and beach possible, the max. depth is 30 m. Most of the dive spots are reefs or hangs. The boattrip dures between 15 and 90 minutes.
Highlight Name und kind of divespots, description of the UW animals	<p><u>AL MUNNASSIR WRECK</u></p> <p>The Al Munnassir is a Royal Oman Navy ship which was sunk for divers in 2003. The Al Munnassir is 84 meters long and sits between 12 and 34 meters deep depending on high or low tide. Although the Al Munnassir has not been in the water so long there are plenty of soft corals growing on the ship, an abundance of marine life have made a home of the ship. You can find big Honey Comb Morays swimming around, quite often Sting Rays and big Groupers at the stern area, lots of Nudibrach and big schools of Snapper, Fusiliers and plenty of other fish swimming around. The Al Munnassir is one of the most popular dives in the Bandar Khairan area.</p> <p><u>FAHAL ISLAND</u></p> <p>Fahal Island is a small island close to Muscat which is very popular with divers, it's best to dive the North side first as here you will find the deeper sites here, on the North side there is a shallow area around 8 to 12 meters where you will find big rocks covered in soft corals and loads of marine life including big schools of fish, Lobster, Turtles, Cuttle Fish, Fusiliers, Snapper and small Barracuda. As you follow the reef you will go deeper to around 25 meters in this area you may find Sting Rays, Eagle Rays, Schools of Jack fish, Rainbow Runners and many other fish, if you are lucky you may</p>

	<p>also find a shark or two.</p> <p>The South side of Fahal you can find shallower dive sites with soft and some hard corals, you can find plenty of Sting Rays sitting on the sand, we have also spotted Black Tip Reef Sharks and Lemon Sharks in this area and plenty of other marine life including Moray Eels, Turtles, Cuttle Fish and big schools of fish swimming around.</p> <p>From time to time Whale Sharks, Bullsharks or Lemonsharks can be seen around Fahal Island, specially in the summer season.</p> <p><u>DAYMANIYAT ISLANDS</u></p> <p>The Daymaniyat Islands are a group of islands located North of Muscat and are a Marine Reserve area. You will find plenty of soft and hard corals on the dive sites here, there is also an abundance of fish life, there is more chance to see Sharks here and we have regular sightings of Leopard Sharks, Black Tip Reef Sharks and the occasional Whale Shark around the Islands, besides the many Morays, Scorpion Fish, Turtles, Cuttle Fish and numerous schools of fish swimming round we also regularly find Sea Horses in this area.</p> <p>All trips are subject to weather conditions</p>
UW Flora & Fauna	<p>we have lot of different corals, hard corals, soft corals with schools of snappers, different kinds of rays, turtles and sharks.</p> <p>In september and october we can see whale sharks at the daymaniat Islands and sometimes at fahal island.</p>
